TATTOO AFTERCARE

PASADENA SINCE 1992

STANDARD WRAP

1. Leave the wrap on **2 hours**, then remove and throw it away.
2. Wash with **warm water and a soft soap**, using your hand. Never scrub.
3. Pat dry. Do not re-wrap it.
4. **Curel or Lubriderm**, lightly, twice a day, 4 to 10 days.

SANIDERM

1. Leave the film on **3 to 5 days**. Fluid underneath is normal.
2. Peel it off **slowly, in the shower, under warm water**.
3. Wash gently with unscented soap, pat dry.
4. Thin layer of unscented lotion twice a day from there.

FIRST MONTH, EITHER WAY

SUN
SOAKING
SWIMMING
PICKING
SCRATCHING

NO

ALOE VERA
VASELINE
RUBBING ALCOHOL
HYDROGEN PEROXIDE

Flaking and a dull look while it heals are normal.

PIERCING AFTERCARE

PASADENA SINCE 1992

TWICE A DAY, FOR 8 WEEKS

- Wash with **antibacterial soap**, twice a day.
- Apply **Bactine**, twice a day.
- Keep both up for the **first 8 weeks**.

TONGUE AND LIP

- Inside the mouth, use an **antibacterial mouthwash or antiseptic oral rinse**, like Listerine, instead of Bactine.
- On the **outside of a lip piercing**, use Bactine as above.
- Keep it clean and keep up **good oral hygiene**.

LEAVE THE JEWELRY ALONE

Keep the original jewelry in for **at least 8 weeks** before you change it.

A piercing can take **a full year** to heal, even once it looks done on the outside. Changing it early is the most common way a good piercing goes wrong.

CALL US IF

Anything looks off. Call the shop and we will take a look. That is what we are here for.

(626) 683-8380 · INTHESKINTATTOO.COM

586 N LAKE AVE, PASADENA CA 91101
PIERCINGS WED, FRI, SAT, SUN. CALL AHEAD.
